Students can use their WVU ID in the Grubhub mobile app to buy food from participating Dining Services locations using Mountie Bounty, Dining Dollars or meal plans. Follow these instructions to add your WVU ID to the Grubhub app.

1. Open the Grubhub app. At the bottom of the home screen, select **My Grubhub** to access your account profile.

2. Tap the **Gear** icon to access **Settings**, then tap **Payment** to display your payment methods stored in the app.

3. Select **Add new payment**. Once the prompt appears, choose **Mountaineer Card**.
4. You will then be prompted to enter your WVU Login ID and password. Then authenticate using Duo two-factor authentication.

5. The Grubhub app will then be ready for purchases using your WVU ID.

Note: Alternatively, you can select My Grubhub, go to Settings, and then select Campus Dining. Once there, you can enter your WVU credentials and authenticate using Duo two-factor authentication. This will add your WVU ID to the app as well.
